TEAMWEAR

ABOUT US

To know our story, we need to start by looking into our history. Our history is one thing we are so fond of expressing and proud of relating to.

omtex was formed in 1969, at a juncture when the trend in India was following global brands for sportswear. Working towards a competitive edge was essential. For omtex, being competitive was foundational since the vision of establishing omtex was tied with a passionate endeavour to bring top quality products and novelties.

The aim with which omtex was formed was to generate stunning and high-quality products that were comfortable and that would contribute towards performance on fitness and sports routines.

Entering the market to bring out products that not only matched the popular brands but also which came at a decent pricing broke the jinx of buying only international brands.

We look up to our folks who have been instrumental in getting us where we are today.

Be it new ideas, a passionate approach, a dedicated work culture, a futuristic endeavour, a risk-taking attitude, an affinity to embrace technology, we have been fortunate to have the ingredients in a proper measure.

From our founder to the next generations, at the core we have a heart for sports and a desire for sports lovers to experience active health-wear of high-end quality and enjoy the comfort of innovative fabrics to enhance performance.

The legacy not only is a motivation, but it also challenges us to strive to maintain high standards and exceed them, always working to excel in what we do.

At the helm, we are constantly exploring to improve and upgrade, and every individual in every responsibility wants to be a valuable contributor.

Process

Fabric Details

CRICKET WHITE - JONTY

100% polyester,
Moisture management,
breathable fabric with wicking finish.

94% polyester 6% spandex interlock
with moisture management anti
microbial finish.

KINGS

100% micro polyester,
Moisture management,
Breathable fabric with wicking finish.

ROYAL

100% micro polyester,
Moisture management,
Breathable fabric with wicking finish.

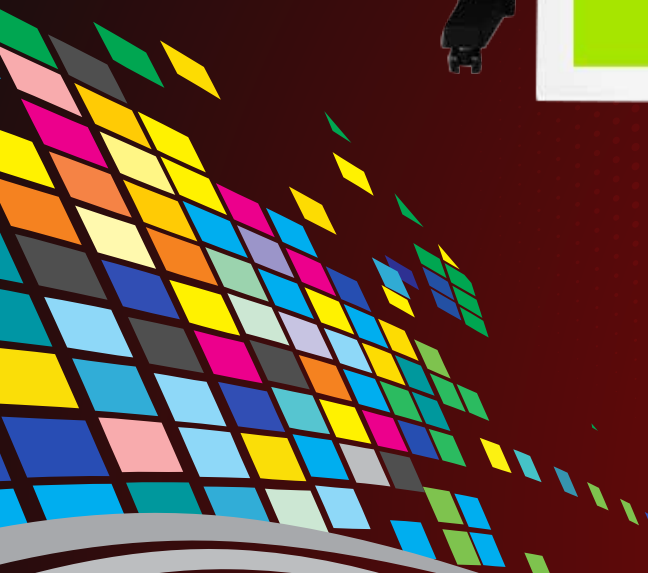

SVG CREAM

100% micro polyester,
Moisture management,
Breathable fabric with wicking finish.

WHAT IS SUBLIMATION?

The most durable way of highest level of detail sublimation printing cannot ever crack or peel so is our preferred method of application. Sublimation printing cannot peel or crack like traditional screen printing. Sublimation is the process by which ink is fused into the fabric of a garment, dramatically increasing design possibilities and allowing you to create a truly bespoke kit. By printing designs direct into fabric compared to using a cricket shirt, sublimation opens up the opportunities to provide teams with a unique printing look.

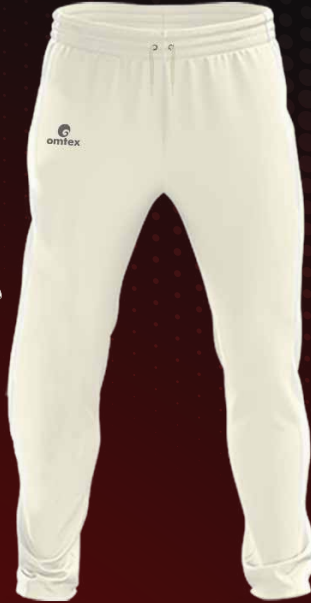

WHITE PLAYING KIT
